(a) Width depends on the shoulder definition
$\Gamma_f = 2cf_{\mathrm{Rabi}}$
Numerical $P_e = 0.5$ width
First-shoulder half-depth width
Full width (kHz)
10^3
10^2
10^1
10^0
10^1
10^2
f_{Rabi} (MHz)
(b) Validity of the cutoff law
$P_e = 0.5$ width / formula
First-shoulder width / formula
Within 5%
Numerical / asymptotic width
6×10^0
4×10^0
3×10^0
2×10^0
10^0
10^0
10^1
$a = \Omega_0 \tau$
