Ramps fit inside the original 30 µs; no peak or area renormalization
Which part of the pulse changes?
Window multiplier
Time relative to midpoint (µs)
Hard endpoints
6 µs per-edge taper
14.75 µs per-edge taper
15 µs per-edge taper
Whole-pulse polynomial
Outer tail at cutoff 0.001
I / (A × cutoff)
Time relative to midpoint (µs)
Central 16 ns echo transition
I / A
Time relative to midpoint (ns)
